

1. The login page has login/signup forms for both vendors and customers.  
Vendor accounts already in the database -  
Username - mtg-mint-card, password - password; Username - test-vendor1, password - password1.  
Customer accounts already in the database -  
Username - abhik107, password - password; Username - test-customer1, password - password1.  
Signup form can be used to create new accounts for both types of users.

2. After a vendor user logs in, they are taken to the vendor dashboard, there is a navigation bar on the left side. Items can be added, viewed, updated and deleted.

Only items posted by a specific vendor show up when said vendor is logged into the dashboard. All items posted by all users show up on the customer dashboard.

The delete functionality is a soft delete, the item is not removed from the database but the deleted column is changed from 0 to 1; and only items with deleted == 0 show up in the frontend.

- When a customer user signs in they are taken to the customer dashboard. The home page displays all items that have been listed by all vendors. The search bar can be used to search for items by name. The cart page shows all the items that are in a user's cart. The previous orders page shows all of the user's past orders.

A user can freely add and remove items from cart, when adding quantity can be specified. Remove removes the item from the cart regardless of quantity. If an item

exists in the cart already and it is added again, the quantity in the cart is incremented accordingly.
